**DIRECTOR OF CENTRAL INTELLIGENCE
Committee on Exchanges**

EC-161-76
4 August 1976

MEMORANDUM FOR: Executive Secretary
National Foreign Intelligence Board

25X1

FROM : [REDACTED]
Chairman, Committee on Exchanges

SUBJECT : Monthly Report - July 1976
Ongoing/Pending COMEX Actions

1. Administrative/Organizational

Ongoing:

a. Gain/Loss Evaluation - Individual Exchanges. (See June 1976 COMEX Monthly Report) The production of COMEX "intelligence" gain/loss evaluations, for the US-USSR exchanges due for renegotiation prior to May 1977, continue to move forward (i.e., S&T, Environment, Health [including Artificial Heart] and Space).

Electrometallurgy--Draft paper being circulated to working group for comments, corrections and/or approval.

Computer Applications--Draft paper being circulated to working group for comments, corrections and/or approval.

Chemical Catalysis--Working group reviewing material and project a preliminary draft report during first two weeks in August to be circulated to working group members for comments, corrections and/or approval.

Science Policy--Working group held its first meeting on 28 July 1976. All of the working group have received a complete packet [REDACTED] COMEX file material. Chairman to review working group approach with COMEX shortly.

25X1

25X1

[REDACTED]
25X1

CONFIDENTIAL

CONFIDENTIAL

EC-161-76
4 August 1976

Microbiology--Chairman has reviewed intelligence materials and broken it out into review topics for assignment to members of his working group.

Water Resources--The leader of the CIA working team on this subject has reviewed the material [redacted]

25X1

25X1

[redacted] Work is expected to begin sometime after 1 August 1976 with a target date for completion of 31 August 1976.

25X1

Space--Working group chairman, Chairman of WSSIC Space Systems Subcommittee, has been given WSSIC approval to produce an intelligence gain/loss evaluation for COMEX. Working group has received intelligence materials from the COMEX Secretariat.

Environment--Nominations for a working group on Environment have been received from CIA, AFSTC, and Navy. Organization of a working group will be accomplished early in August 1976. Intelligence materials are being researched for this working group.

Health--The Army and Air Force have indicated that they have a limited capability to produce an "intelligence" gain/loss evaluation and will forward nominations shortly.

Pending:

Preparation for Implementing DoD Directive. Intelligence reorganization of DoD continues to delay implementation of this directive.

DIRECTOR OF CENTRAL INTELLIGENCE
Critical Collection Problems Committee

CCPC-CIA-M-51/76
18 August 1976

MEMORANDUM FOR: Executive Secretary, NFIB
FROM: Eloise R. Page
Acting Chairman
SUBJECT: Ongoing/Pending CCPC Actions

I. Ongoing Activities

A. Study on Intelligence Activities Against Narcotics
and Dangerous Drugs

What we fervently hope to be the final draft of the CCPC Executive Summary and Conclusions and Recommendations portion of the narcotics study has been circulated for concurrence.

B. Study on Terrorist Activities

1. The CCPC has begun a study on Intelligence Activities Against International Terrorism. This study will focus on foreign terrorists groups which present major threats to U.S. officials and installations rather than encompassing all domestic-type terrorism or revolutionary and liberation movements.

2. A basic part of the study will be a current appraisal of the U.S. knowledge of international terrorism, a listing of major information gaps and a description of intelligence collection capabilities. Major problems hindering the U.S. intelligence effort will be examined and recommendations made as to measures which could or should be taken to improve our overall intelligence on international terrorism.

Human Resources Committee

Office of the Chairman

HRC-C-76-024

30 July 1976

MEMORANDUM FOR: Executive Secretary
National Foreign Intelligence Board

SUBJECT : Status of On-Going/Pending
HRC Actions

The attached report briefly describes activities which
have taken place during the past month under various HRC
Program Tasks.

25X1

Executive Secretary

Attachment:
Status Report

25X1

SECRET

SECRET

HRC

Highlights

1. The HRC Subcommittees were very active during July. The Guidance and Requirements (G&R), Research and Development (R&D), and Orientation and Training (OTAG) committees each met twice. The Plans and Programming Subcommittee (P&P) met three times as it continued to develop portions of the National Human Resources Foreign Information Plan (NHRP). While the Assessments Subcommittee did not meet, work on Project FOCUS continued, as described below. Minutes from all these meetings are on file.

25X1

2. Each month brings a number of requests to the Chairman HRC that are responded to by Staff using contacts with HRC members and others in various agencies.

25X1

SECRET

SECRET

25X1

C. Ongoing Activities

3. Training Survey. The Staff has completed a draft compilation of training courses currently offered by Departments and Agencies which are intended to prepare information gatherers for overseas assignments. After review by OTAG, the reference document will be made available for use by training officers and potential students. "The result may be a more effective use of resources by enabling, where appropriate, students to take advantage of courses sponsored in agencies other than their own, thereby possibly reducing duplications in training."

4. Briefing and Debriefing. OTAG is continuing its consideration of an Interagency Orientation, Briefing, and Debriefing Program paper prepared in the Staff.

5. Relationships with non-NFIB Agencies. The G&R Subcommittee is continuing discussions aimed at establishing contact and encouraging dialog between the Intelligence Community and the non-NFIB agencies. One concern is to ensure that the Intelligence Community profits from regular reporting of foreign developments and the general informational flow of these agencies. Another area of exploration deals with the potential to obtain information from non-NFIB agencies that might be somewhat outside their normal areas of interest, but which their field reporters might be willing to provide if they better understood the interests and concerns of the Intelligence Community.

- 2 -

SECRET

SECRET

25X1

6. R&D Review. A frame of reference paper has been developed by [redacted] of the R&D Subcommittee dealing with human resources "skills augmentation" (equipment support, etc.). This paper will be merged with an earlier paper on "skills enhancement" (maximizing human potential). The final paper, expected to be completed in 2-3 weeks, "should provide a means to examine human collection R&D from either a substantive or resource allocation viewpoint."

25X1

25X1

25X1

25X1

8. Protection of Human Subjects.

25X1

25X1

[redacted] This approach, which has been reported to the R&D Subcommittee, is intended to ensure that human research undertaken by intelligence community components is in compliance with E.O. 11905 and the National Commission. "Principles must be enunciated within the Community whereby each organization can work out procedures that will allow the dual responsibilities to the subject and to security to be met." (See HRC-R&D-M-009.)

25X1

NEW ACTIVITIES

2. State/INR Proposal to CFI for a Central Information and Retrieval System.

State/INR in its FY 1978-1982 Program Plans, briefed to the CFI on July 15, 1976, included a proposal that consideration be given to a central information dissemination and retrieval system operated as a service of common concern. In a letter to the D/DCI/IC, the Director, INR referred to the deficiencies of current methods of sorting, delivering, filing and finding materials and suggested that these common problems should be addressed by a service of common concern, by a community approach rather than multiple partial solutions. He further noted that ideally this community computer system would enable analysts to have terminals that would provide a wide range of services, such as file creation, text composition and processing, data manipulation, and graphic displays. At a minimum it should receive the electrical message output each agency is prepared to share, automatically indexing this material in ways already being used by the new NMIC system, and make it available through terminals located at users desks. The Director, INR suggested that the IHC was the proper forum to

25X1

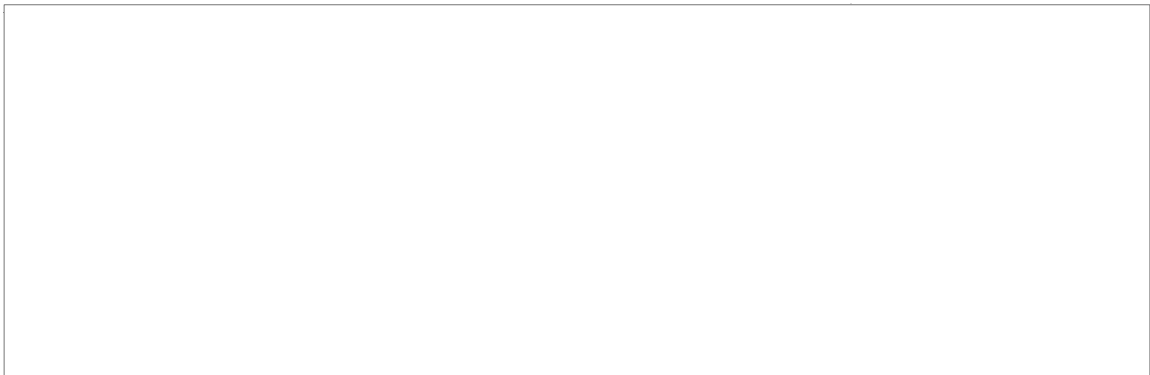

25X1

CONFIDENTIAL

sponsor the necessary studies of this problem. The D/DCI/IC has instructed IHC to look into this and provide him with an appraisal of the proposal and, if appropriate, its recommendations regarding feasibility and design studies.

ON-GOING ACTIVITIES

25X1

25X1

2. Installation of [redacted] Terminals in ERDA [redacted]

25X1

25X1

As previously reported, the Energy Research and Development Administration (ERDA) requested ASD(I) permission to install a [redacted] terminal at [redacted] a contractor facility,

25X1

for a six months' trial. If this proves successful, ERDA wishes to install [redacted] terminals in three other ERDA contractor [redacted]

25X1

25X1

[redacted] We and the DCI Security Committee had suggested to representatives of ERDA and OASD(I) that this request be submitted to the DCI Security Committee for community coordination, as ERDA's letter requesting the terminals refers to the exemption from contractor status granted [redacted] in the DCI Policy Paper on Information Release to Contractors (attachment to DCID 1/7). This exemption was a limited exemption to permit the flow of "need to know" documents and was not meant to permit unrestricted access to intelligence information.

25X1

25X1

However, OASD(I) elected to contact the agencies participating [redacted] directly for their views on this matter and the security aspect has apparently not been resolved.

25X1

25X1

3. Project [redacted]

A tasking memorandum has been prepared and forwarded to each of the agency representatives or points of contact for Project [redacted]. This document provides the milestones for the Project, information for future planning, and an overview of the [redacted] program. Among

25X1

25X1

CONFIDENTIAL

CONFIDENTIAL

other things, the overview discusses the organizational structure, the technical concept, assignment of responsibilities, hardware and the time schedule underlying the milestones. 25X1

25X1

Preparation of a program and plans for the training course for operators are proceeding on schedule. A demonstration of the system was given to representatives of CIA/Office of Training who have agreed to assist in structuring the training courses which will take place from late August through October 1976.

25X1

4. IHC Data Standards Panel Meeting

At the July meeting it was reported that contrary to agreement the NBS had published a brochure containing both the ANSI and ISO codes designating countries. In view of this the Chairman suggested that a previous proposal to send a letter to the Director, Institute for Computer Sciences and Technology, National Bureau of Standards (NBS), be reconsidered. The purpose of the letter would be to encourage coordination of proposed standards by the NBS with other Federal agencies prior to promulgation. It would include a proposal that NBS sponsor a meeting of representatives of the various agencies regarding the FIPS Program. As agreed by the Panel, the Panel Chairman will draft a letter to NBS for the signature of the Chairman, IHC. It was also agreed that the Panel would continue to work on a draft of "Data Standards for the U.S. Intelligence Community" and the approach will be modular. The Panel also requested DIA representatives to develop a revised draft of DCID 1/15 for consideration.

5. World-Wide Military Command and Control System (WWMCCS)/ Intelligence Interface.

A briefing was presented to the DCI by Mr. W. Henderson, OASD(I) on this subject. It reviewed the status of the existing WWMCCS/ Intelligence Interface and stressed the need for faster, more efficient connectivity of appropriate operations/intelligence officers in crisis management situations. Mr. Henderson said that ASD(I) is proposing the establishment of a community-wide working group to perform an in-depth analysis of the WWMCCS/Intelligence Architecture. This group would initially convene in October and, after approximately a one-year period, would report its findings to the WWMCCS Council for review and approval.

CONFIDENTIAL

CONFIDENTIAL

At a later meeting at the Pentagon it was developed that the working group would involve about 25 professionals. Both OASD(I) and DIA are prepared to be the parent agency under which the study will be performed, and this is being referred to ASD(I) for clarification.

The Chairman, IHC is the focal point for the DCI in matters concerning WWMCCS and will continue to be concerned with this current proposal. At present the IHD staff is also reviewing the impact of one of the preliminary recommendations of the IBM WWMCCS architecture studies: the interoperability of the [REDACTED]

2 August 1976

MEMORANDUM FOR: Executive Secretary, NFIB

FROM

:

Chairman

25X1

SUBJECT

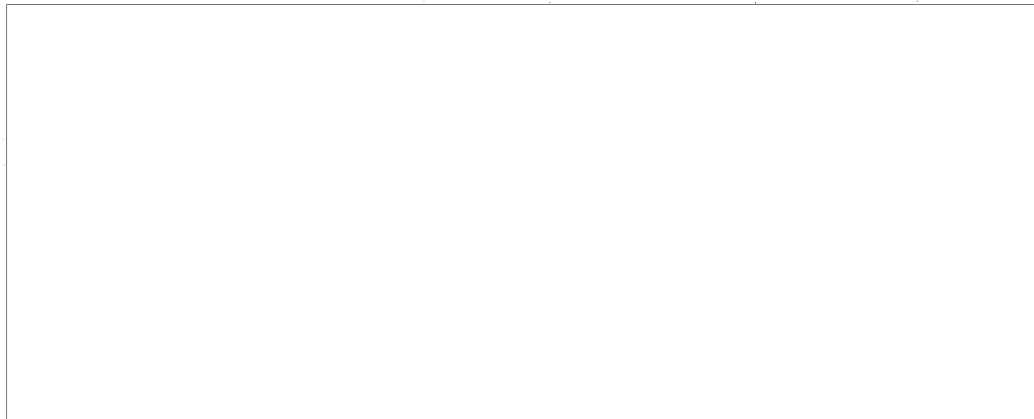

: Status of Ongoing/Pending Actions - July 1976

Ongoing Activities

(a) The Chairman provided a biweekly report to the D/DCI/IC of actions being taken for implementing the secrecy procedures required by Executive Order 11905. The proposed DCID 1/19 was redrafted and forwarded to the OGC/CIA for recommendations as to its legality.

(b) The proposed DCID on duty and travel restrictions for persons with access to Sensitive Compartmented Information is being considered by OGC/CIA. They have been requested to coordinate a community legal opinion on travel restrictions imposed on persons having access to this information.

25X1

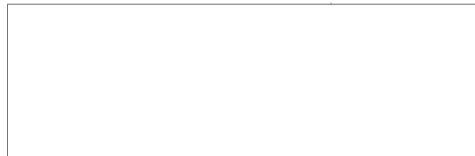

New Activities

The Security Committee learned that the Domestic Council Task Force updating Executive Order 10450 had completed their assignment and forwarded a proposed draft to the Domestic Council Chairman recommending early formal coordination through OMB. Actions were immediately initiated to ensure intelligence community input prior to this happening. It is now to be referred to the DCI for Security Committee consideration.

Major Milestones

1. DCID 1/19 -- Estimated date of completion: August 1976.
2. E.O. 10450 -- Estimated date of completion: end of August 1976.
